Grade 4-8?Between 1854 and 1930, more than 200,000 orphaned and abandoned children from the cities of the eastern seaboard were "placed out" to new homes and families in the midwest and western states. Warren's account of the "orphan-train" phenomena, and of one man's story of how it affected his life, is an excellent introduction to researching or discussing children-at-risk in an earlier generation. The book is clearly written and illustrated with numerous black-and-white photographs and reproductions. The chapters alternate information about the largest agency, the Children's Aid Society, and its history, with the story of Lee Nailling, from whom the author has gathered the facts of his own childhood journey to Texas and his eventual reunion, late in life, with some of his long-lost siblings. Human interest is skillfully interspersed with factual information to create a fascinating book about a social movement that predated today's foster homes, adoption agencies, and homeless shelters. Annette R. Fry's *The Orphan Trains* (New Discovery, 1994) is written for the same age group and efficiently provides detailed information for research and reports. Eve Bunting's *Train to Somewhere* (Clarion, 1996), a picture book, tells the story for younger children. Together these books offer opportunities for discussion about the sometimes happy and sometimes misguided efforts to care for the orphaned and abandoned in our country's past. But if only one book can be acquired, Warren's title offers a wealth of information and is rich in human interest. It should be the primary purchase. Gr. 4<sup>^</sup>-6. From 1854 to 1930, the orphan trains took homeless children from cities in the East to new homes in the West, the Midwest, and the South. In Warren's book, one man's memories of his childhood abandonment and adoption give a personal slant on the subject. Chapters telling the story of Lee Nailing, who took an orphan train west in 1926, alternate with chapters filling in background information about the trains and the experiences of other children who rode them to their destinies. Throughout the book, black-and-white photos show both the people and places in Nailing's story and the broader topic of the orphan train experience. Children will find this a good resource on an intriguing subject. Carolyn Phelan

Between 1854 and 1930, more than 200,000 orphaned or abandoned children were sent west on orphan trains to find new homes. Some were adopted by loving families; others were not as fortunate. In recent years, some of the riders have begun to share their stories. Andrea Warren alternates chapters about the history of the orphan trains with the story of Lee Nailling, who in 1926 rode an orphan train to Texas when he was nine years old.

A Wonderful True Story!

By Mary Burnight

This book is well written with much historical information about the time of Orphan Trains. What I enjoyed among the chapters was the train ride of Lee Nailing, then his adult life which ensued his growing up....but most of all, I just loved to know of his first week in Texas and his eventual beginning 2 days with the Nailing family: so interesting for me to see him rise above bitterness within a supportive family!

Orphan Train Rider: One Boy's True Story

By Kindle Customer

Interesting subject but not presented well.

Also I was extremely disappointed in discovering this was not a "full size" book, but a mere 80 page story. I was shocked when I reached the last page, expecting the story to develop further. I even reviewed the book

thinking I must have missed several chapters somehow.

It was my error for not checking how long the book was before I ordered, but I definitely feel short changed.
