Review

Chiropractic Journal of Australia, December 2004 "The new inclusions in this edition significantly strengthen the work. This new edition is a solid contribution." "My principal reason for recommending Reserch Methods for Clinical Therapists is that not only can I understand it, I even enjoyed reading it and in statistical language that is a highly significant measure." Dr David Cockburn; Clinical and Experimental Optometry; Vol.88 "The book is intended to reduce the fear associated with statistics and research, and is successful in achieving this. The is a must for all clinical departments endeavouring to practice evidence-based health care, and woudl be useful for undergraduate students and clinicians of all grades." Rachel Garrod

"This is the latest edition of a well established research text that aims to inform the reader about the design and analysis of experimental studies. It provides wide coverage of all aspects of experimental deisgn relevant to therapists including dissemination and critical evaluation." PGM, 2010 Vol. 27:1

I found this book very useful when I was asked to do a research project during my OT level II fieldwork. I knew what type of experiment I wanted to do, but was having trouble with the statistical aspect of the project. This book did a nice job of explaining step by step how to chose your statistical test depending on your experimental design. It also walked you through step by step how to do the calculations. I had tried looking online for answers to my questions, but just became more confused. This book cleared things up for me very nicely. See all 1 customer reviews...
